Cookies use policy

What are cookies?

A cookie is a small text file that is downloaded onto 'terminal equipment' (e.g. a computer or smartphone) when the user accesses a website. It allows the website to recognize that user's device and store some information about the user's preferences or past actions.

How do we use cookies and why is it safe for you?

You may notice the presence of different types of cookies generated on your visit to this website. We use three types of cookies:

Session cookies, which are automatically deleted after every visit.
These enable you to perform essential functions on the site, such as remembering a repeat form field item within a browsing session. In addition, they help by limiting the need to transfer information across the Internet. They are not stored on your computer and will expire when you terminate your browser session.

Persistent cookies, that will remain in place during multiple visits to the site.
These enable us to recognize anonymous repeat visitors to the site. By matching an anonymous, randomly generated identifier, a record can be taken of specific browsing information such as how you arrive at the site, the pages you view, options you select, and the path taken through the site. By monitoring this information we are able to make improvements to the site, including the fixing of errors and the enhancement of content.

We use special software to analyze page use, page interactions and the routes taken through our sites. These are known as 'website metrics' or 'analytics'. We do not record any personal information as part of this process.

Third party cookies, which are used by partner websites that are embedded within our site or that we link to.
When you visit our site you may notice some cookies that are related to third parties. If you go on to a web page that contains embedded content, for example from Facebook or YouTube, you may be sent cookies from these websites. We do not control the generation of third party cookies, so we suggest that you check the individual third-party websites for more information about their cookies and how to manage them.

How to control cookies?

We will not use cookies to collect personally identifiable information about you. However, should you choose to disable, reject or block our cookies, some parts of our website will not function fully, or in some cases, our website will not be accessible at all.

For more information on how to control your cookie settings and browser settings, or how to delete cookies on your hard drive, please visit http://www.aboutcookies.org.
